Dear Sir/Madam,

RE: Application for BSc Artificial Intelligence and Computer Science (GG47)

– Request for Admission with Advanced Standing and Assessment of Prior Learning

I wish to apply for admission to the above programme with a view to graduating immediately, based on 32 US semester credits of prior formal study and a comprehensive portfolio of prior experiential learning.

My previous college coursework, completed at UMGC and SFSU maps directly to five core

modules of Year 1 (Introduction to Programming, Data Structures & Algorithms, Mathematics

for Computer Science, Computer Systems, and Logic & Computation). I hold certified evidence of this learning, equating to 96 UK CATS credits.

For the remaining 264 credits (all Year 2 and Year 3 modules), I have compiled a detailed Prior Learning Assessment portfolio that demonstrates I have already met every learning outcome through 8+ years of professional software and AI engineering, project leadership,

and independent study. My CV, work samples, and signed competency statements are enclosed.

If, after evaluation, you agree that I have satisfied all programme requirements, I respectfully request that the Board of Examiners consider me for the award of the BSc degree without requiring further study.

I am available for interview or technical examination at your convenience.

Yours faithfully,

Caustin lee mclaughlin
